What we Do?

We understand what Exactly Client requires and we do Site Survey, Design, Planning & Execution of:

- Rooftop Solar/Ground Mounted - kWp to MWp
- Solar On Grid/Hybrid Systems
- Solar BOS - Balance Of System
- Solar Street Lights
- Solar Fencing
- Solar Pump Sets
- Solar Glass Elevations
- Floating Solar
- Solar Water Heaters - ETC/FPC
- Operations & Maintenance (O&M)

Subsidy till March 31st 2027

Our Services

Domestic Solar (Ongrid)

On-Grid (Grid-Tied):

- Solar panels generate DC electricity → inverter converts DC to AC → powers home.
- Surplus exported to grid via net metering, earning bill credits.
- At night or cloudy days, power is drawn from grid.
- Stops working during outages for safety.

Domestic Solar (Hybrid)

Hybrid System:

- Solar powers home + charges batteries LifePO4 during the day.
- Batteries supply power at night or during outages.
- Grid acts as backup when solar + batteries are insufficient.
- Smart hybrid inverters prioritize solar → battery → grid automatically.

Commercial Solar

Slash power bills instantly. Recover your investment in just 3 to 5 years. Lock in long-term energy savings. Build a bold, sustainable business identity.

Industrial Solar

Large-scale solar systems powering factories & Industries.

Get Tax Depreciation benefits
